To Whom It May Concern,

We recently completed the 22,000 square foot build-out of our new offices in Washington, D.C. We were very pleased with our electrical sub-contractor IDE Associates, LLC. Our high end offices and conference center facilities were completed on time and on budget with thanks to contractors like IDE. We had challenging late changes to our A/V system in our training rooms and were very pleased to find IDE taking a pro-active approach, working with the general contractor and A/V vendor to find and implement ideal solutions in a timely manner.

Upon completion of our offices, we had further lighting changes we wanted to make. Our general contractor instructed us to work directly with IDE. We were extremely pleased with their quick response and solutions to our needs. We are currently working directly with IDE to design and install additional lighting in our large boardrooms. With their prompt response and professional attitudes, I look forward to a continued successful relationship with IDE Associates, LLC.

We wouldn't consider using another electrical contractor other than IDE Associates, LLC.

Feel free to contact me directly for a reference.
